

# Release note

## Title Catalog

### Release date: 16 May 2013

The Catalog is the heart of Movida; it contains all of the collections, series, episodes, and features that you schedule and publish on your (or third party) platforms.

This change introduces a new look and feel for the various Catalog pages as a result of us building and implementing a new "framework" that enables new features to be developed more quickly for you in the future (such as Image management and full support for Renditions, Audio Tracks, and Subtitles).

We've taken the opportunity to squash a few bugs, improve responsiveness and performance (including the Import Titles feature), add some small (but useful!) features, and introduce a visual and functional consistency across the Catalog.

This change should not affect your daily workflow in significant ways, but we hope it will make the Catalog a pleasure for you to use.

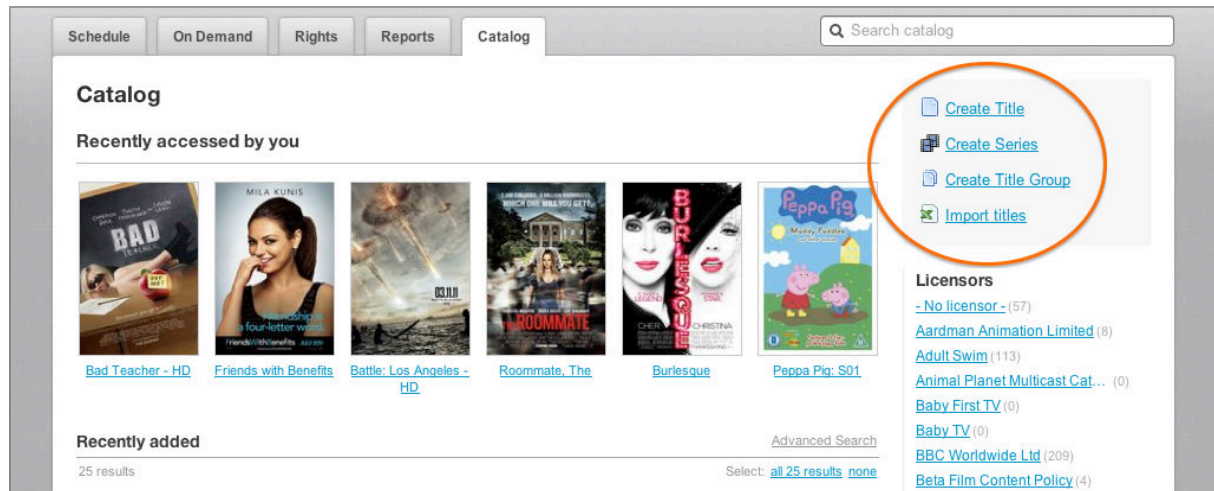

This note describes what has changed in full, and as usual you can contact [support](#) or your technical account manager for further clarification.

### BeBanjo reference(s)

Application	Issue	Title
movida	667	New Layout for the Title and Series pages

## Catalog

When accessing the Catalog the first change you'll notice is that the links for creating content have been moved to the top right; there are now separate links for creating Titles and Series.

## Revised Layout

The most obvious change is the new layout of the page for an entry in the Catalog: the horizontal arrangement of tabs for Overview, Metadata, Schedule, and Rights has been replaced by vertical sidebar on the left of the page.

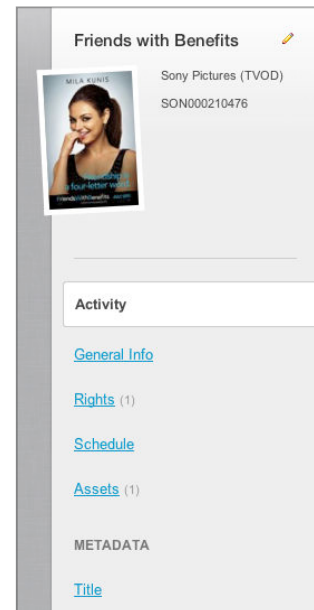

This new vertical layout is clearer, doesn't require you to move between separate tabs, and makes room for new upcoming features like Image Management.

The sidebar provides links to the Activity, General Info, Episodes (for Series and Title Groups), Rights (for features and Series), Rules (for catch-up), Schedule, and Assets.

You can also access metadata groups (e.g. Title, Product, Images) directly from the sidebar (saving valuable clicks!).

The Episodes, Rights, Rules, and Assets links show (in brackets) how many items they contain, again this saves you a little time.

Notice that the Licensor, External ID, Tags and parent Series or Title Group (if applicable) are displayed next to the poster image.

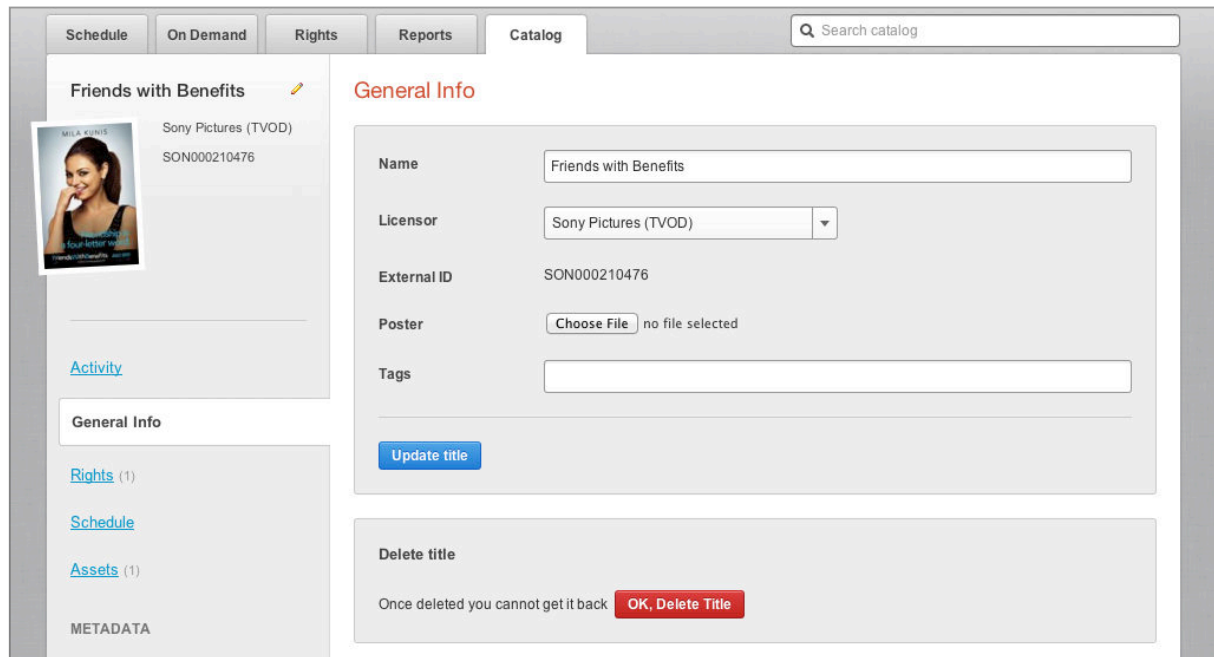

## New date and time picker

All date entry fields have been replaced by a new date picker that always includes a calendar, and a time portion (if applicable). This makes it much easier to enter relative dates, such as "take down a week on Monday".

## Editing the General Information

To edit the General Information for an entry in the Catalog you can either click the pencil icon next to its name, or click on the General Info link in the sidebar. The General Info page lets you change the Name, Licensor, Poster image, and Tags; you can also set the External ID.

The screenshot shows the 'General Info' page for the title 'Friends with Benefits'. The sidebar on the left contains a navigation menu with links for 'Activity', 'General Info', 'Rights (1)', 'Schedule', 'Assets (1)', and 'METADATA'. The main content area has the following fields:

- Name:** Friends with Benefits
- Licensor:** Sony Pictures (TVOD)
- External ID:** SON000210476
- Poster:** Choose File no file selected
- Tags:** (empty text box)

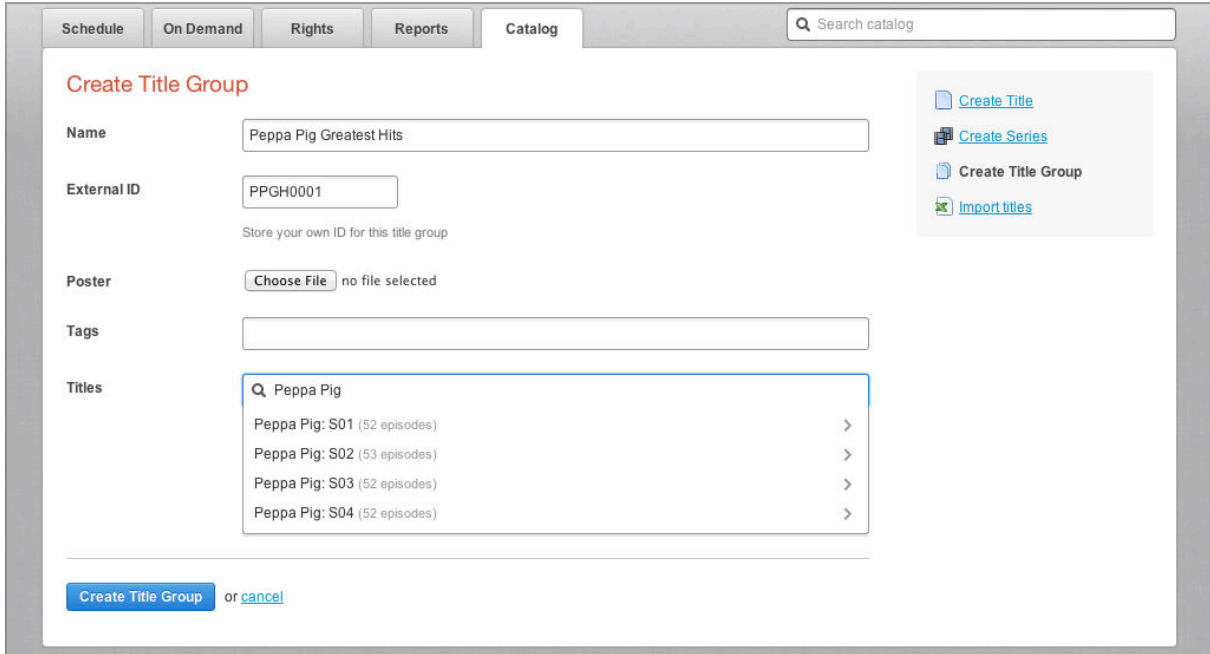

At the bottom of the page, there is a red button labeled 'OK, Delete Title' with the text 'Once deleted you cannot get it back' above it.

The option to delete content has been moved, within the General Info page, and now uses a clearly labeled and separated button; hopefully this will help prevent those "whoops-a-daisy!" moments.

## Creating Title Groups

The Create Title Group (aka Collection) page now uses the same design as the Create Series page, and allows you to create a collection in a single step.

If the title search returns a series then the number of episodes is shown next to the series name and you can select the series to show its episodes; you can also use the cursor keys to quickly move through the search results and episode lists.

**Create Title Group**

**Name**

**External ID**   
Store your own ID for this title group

**Poster**  no file selected

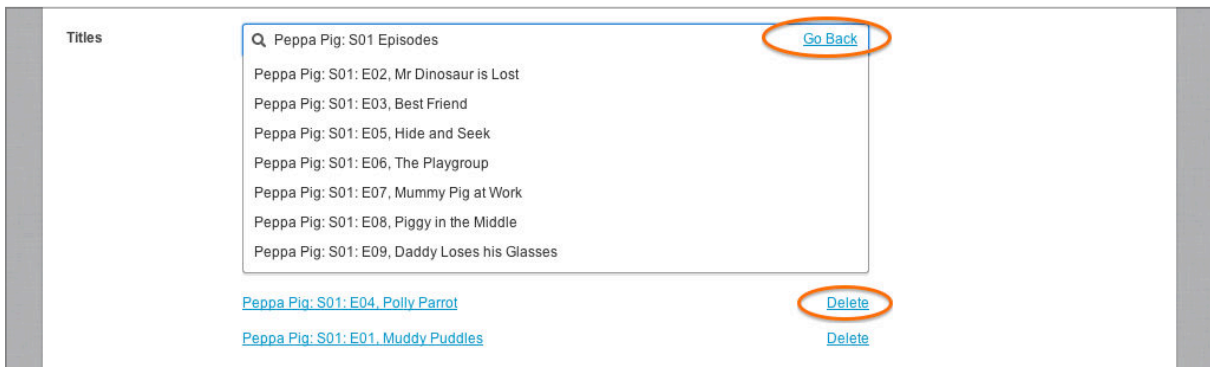

**Tags**

**Titles**

- Q Peppa Pig
- Peppa Pig: S01 (52 episodes) >
- Peppa Pig: S02 (53 episodes) >
- Peppa Pig: S03 (52 episodes) >
- Peppa Pig: S04 (52 episodes) >

or [cancel](#)

As you add titles from the search results they are removed from that list and are shown below the search results; you can delete titles from the collection here as well. Click "Go Back" to return to the search results.

**Titles**

Q Peppa Pig: S01 Episodes [Go Back](#)

- Peppa Pig: S01: E02, Mr Dinosaur is Lost
- Peppa Pig: S01: E03, Best Friend
- Peppa Pig: S01: E05, Hide and Seek
- Peppa Pig: S01: E06, The Playgroup
- Peppa Pig: S01: E07, Mummy Pig at Work
- Peppa Pig: S01: E08, Piggy in the Middle
- Peppa Pig: S01: E09, Daddy Loses his Glasses

[Peppa Pig: S01: E04, Polly Parrot](#) [Delete](#)

[Peppa Pig: S01: E01, Muddy Puddles](#) [Delete](#)

## Navigating Series and Title Groups

When you display the list of content in a Series, or Title Group, the names and external IDs are shown in two columns, This makes it easier to scan the list and find the item you're looking for.

The screenshot shows the 'Peppa Pig: S01' series page. The sidebar on the left contains navigation links: Activity, General Info, Episodes (52) (circled in orange), Rights (1), Schedule, METADATA, and Series. The main content area is titled 'Episodes' and features a table with 12 rows. Each row contains a checkbox, an episode title, and an external ID. The 'Edit Metadata' button is visible at the top right of the episode list.

Episode Title	External ID
<a href="#">E01. Muddy Puddles</a>	E1E000090000
<a href="#">E02. Mr Dinosaur is Lost</a>	E1E000090001
<a href="#">E03. Best Friend</a>	E1E000090002
<a href="#">E04. Polly Parrot</a>	E1E000090003
<a href="#">E05. Hide and Seek</a>	E1E000090004
<a href="#">E06. The Playgroup</a>	E1E000090005
<a href="#">E07. Mummy Pig at Work</a>	E1E000090006
<a href="#">E08. Piggy in the Middle</a>	E1E000090007
<a href="#">E09. Daddy Loses his Glasses</a>	E1E000090008
<a href="#">E10. Gardening</a>	E1E000090009
<a href="#">E11. Hiccups</a>	E1E000090010
<a href="#">E12. Bicycles</a>	E1E000090011

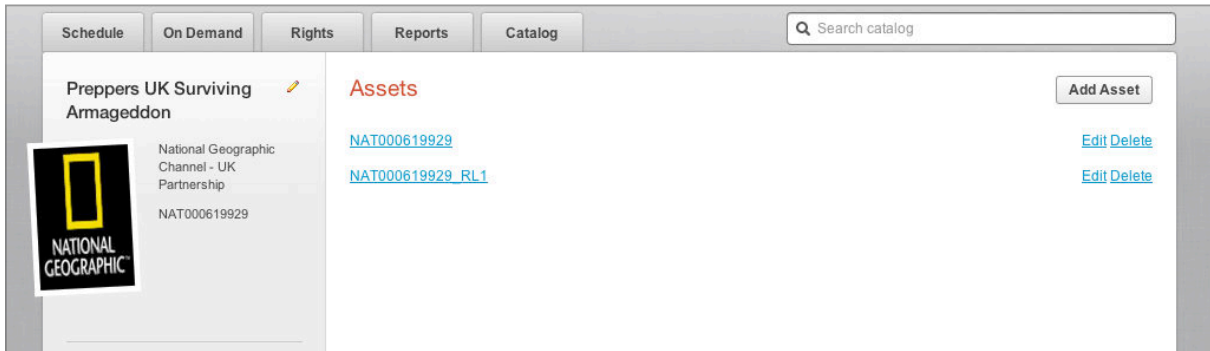

Notice how the Episodes link in the sidebar shows the total number of episodes in the series.

When editing the metadata for multiple episodes in a series you now choose which metadata group to work with; remember that the pre-filled values in the editing page are the ones that all the selected episodes being edited have in common.

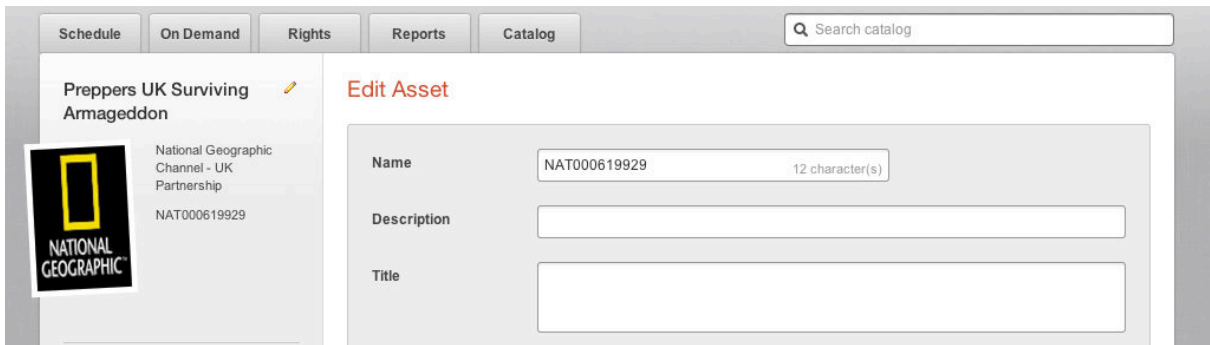

This screenshot shows the same 'Peppa Pig: S01' series page, but with the first eight episodes selected (checkboxes are checked). The 'Edit Metadata' dropdown menu is open, showing three options: Title, Product, and BT Vision Images. The 'Episodes (52)' link in the sidebar is also visible.

## Assets

The Assets for a feature or episode are now shown in a single list from which you can choose to edit or delete an Asset.

When adding or editing an Asset, the name and value of each field are shown in two columns; this makes it easier for you to review the Asset and quickly move through it to make updates.

## Rights

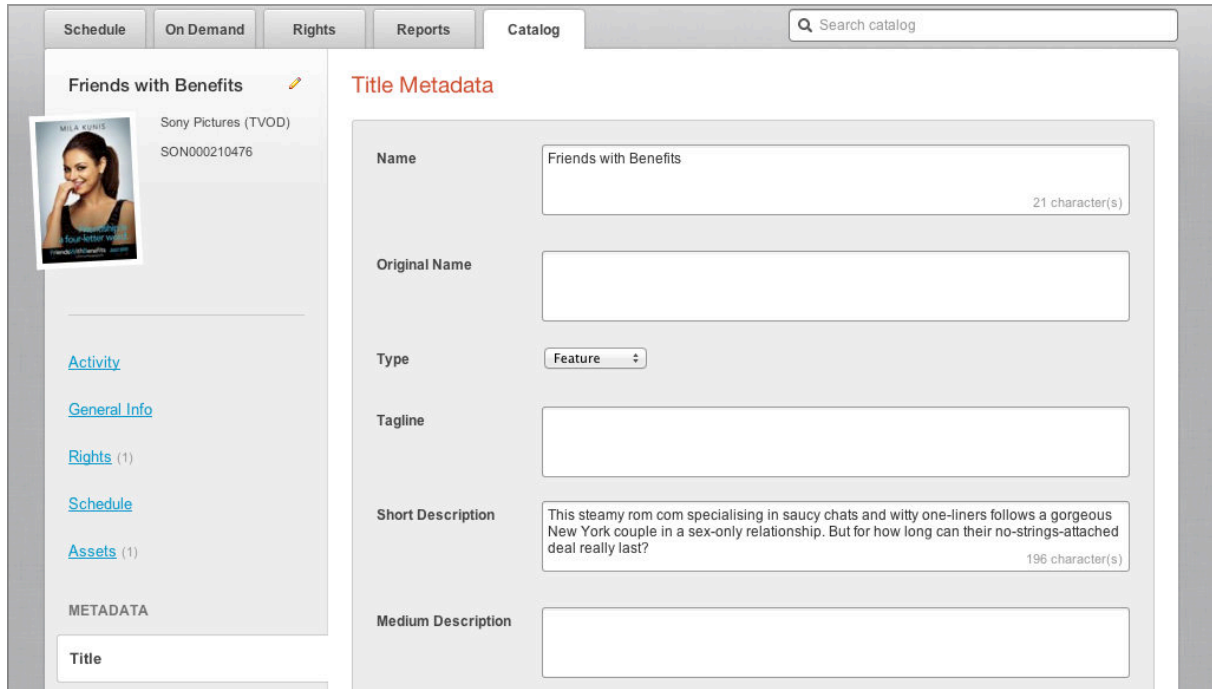

The layout of the Rights pages has been refined and de-cluttered; important information is highlighted in yellow.

## Rules

The layout of the Rules (for VOD catch-up) pages has been refined and de-cluttered.

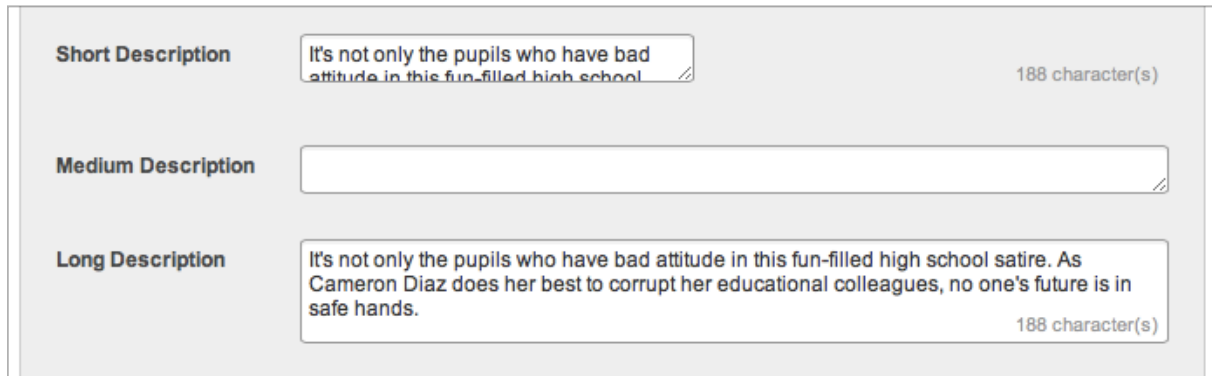

## Metadata

All metadata pages now show the name and value of each field in two columns; this makes it easier for you to scan a page to review the metadata and quickly move through it to make updates.

The screenshot shows the 'Title Metadata' page for the movie 'Friends with Benefits'. The page is divided into a left sidebar and a main content area. The sidebar contains a navigation menu with links for 'Activity', 'General Info', 'Rights (1)', 'Schedule', and 'Assets (1)'. Below the menu is a 'METADATA' section with a 'Title' field. The main content area is titled 'Title Metadata' and contains several form fields: 'Name' (with the value 'Friends with Benefits' and a character count of 21), 'Original Name' (empty), 'Type' (set to 'Feature'), 'Tagline' (empty), 'Short Description' (with the value 'This steamy rom com specialising in saucy chats and witty one-liners follows a gorgeous New York couple in a sex-only relationship. But for how long can their no-strings-attached deal really last?' and a character count of 196), and 'Medium Description' (empty).

There are now three different sizes of text field available in Movida: short, long, and "textarea". In the screenshot above all the text fields are "textarea" and here's an example of the different sizes:

The screenshot shows three different sizes of text fields. The 'Short Description' field is a small, single-line text box containing the text 'It's not only the pupils who have bad attitude in this fun-filled high school' with a character count of 188. The 'Medium Description' field is a larger, single-line text box that is currently empty. The 'Long Description' field is a large, multi-line text box containing the text 'It's not only the pupils who have bad attitude in this fun-filled high school satire. As Cameron Diaz does her best to corrupt her educational colleagues, no one's future is in safe hands.' with a character count of 188.

## Import Titles

The layout of the Microsoft Excel document used by the Import Titles feature has changed slightly to make it consistent with the rest of the Movida application. The "Title" column has been renamed to "Name", and the "Series Title" column has been renamed to "Series Name".

The [instructions page](#) and [example file](#) reflect these changes; you should update your Microsoft Excel documents to use the new column names.
