

Release note

Show all Titles in Sequence that have Problems

Release date: 7 August 2013

A new **With problems** checkbox has been added to the filters section of the Work page; no matter how far in the future the due dates are you can now easily find problematic Titles.

This note describes what has changed in full, and as usual you can contact **support** or your technical account manager for further clarification.

Application	Issue	Title
sequence	238	Filter all jobs with problems

It has always been easy to find the most urgent Titles with Problems, all you needed to do was click "with problems" in the Titles due section of the Overview page. In addition to choosing to show Titles due today or in the next 7 days, you can now choose to see the **next 30 days**.

The screenshot shows a navigation bar with 'OVERVIEW', 'WORK', and 'REPORTS'. Below it, a section titled 'Titles due in the next 30 days' has three tabs: 'Today', '7 days', and '30 days'. The main content area displays four large boxes representing different categories of titles:

- 7 with pending tasks
- 7 waiting for materials
- 7 with problems
- 5478 ready

But, it wasn't easy to find **all** problematic Titles. To fix this problem we've made a number of small but useful changes in the Work page.

The screenshot shows the 'Work' page interface. At the top, there are tabs for 'Assets', 'Tasks', 'Notes', and 'Modify: Title details', 'Tags', 'Delete titles'. There are also buttons for 'Add one title' and 'Add several titles'. Below this, a section titled 'All titles with active problems (7) show everything' is highlighted. A table lists titles with columns for Title, Assets, Tasks, Due date, Status, and Assigned to. The table shows seven entries for 'La dernière marche' with a due date of 11/08/2013 and 4 days left. To the right of the table is a 'Filter' section with a checkbox for 'With problems' (checked), a search field, and a 'Go!' button. Below the search field is a 'Provider' dropdown menu with the text '-- select provider --'.

A new **With problems** checkbox has been added to the filters section and this works for Pending, Going On Air, Coming Off Air, and All titles.

No matter how far in the future the due dates are you can now easily find problematic Titles.

When you choose to show Titles with problems from the Overview page then the Work page is shown with the "With problems" checkbox selected; just uncheck it to remove the filter.

You'll also notice that the Search field has been incorporated into the filters section; the Search field now operates as a filter and can be **combined with any other** filter.

Imagine you filtered the Pending titles list for a particular content Provider, you can now search *within* that filtered list, i.e. both filters will combine. This applies to all of the Work pages: Pending, Going On Air, Coming Off Air, and All titles.

Title	Assets	Tasks	Due date	Status	Assigned to
September 2012 (3)					
Boardwalk Empire: E03, Bone For Tuna	●	●	23/09/2012	Off air for 9 months	
Boardwalk Empire: E03, Bone For Tuna	●	●	23/09/2012	Off air for 9 months	
Boardwalk Empire: E03, Bone For Tuna	●	●	23/09/2012	Off air for 9 months	
December 2012 (4)					
Boardwalk Empire: E03, Bone for Tuna	●	●	23/12/2012	Off air for 7 months	
Boardwalk Empire: E03, Bone for Tuna	●	●	23/12/2012	Off air for 7 months	
Boardwalk Empire: E03, Bone for Tuna	●	●	23/12/2012	Off air for 7 months	

After filtering in the Work page, when you select one of the Titles, the **back to** link at the top of the workflow page for the Title shows the Work page with the **same** filter selections.
