

Release note

Finding the Titles for a Licensor using the API

Release date: 18 September 2014

In the **Catalog** and **Schedule** pages it's easy to find the Titles for a given Licensor, we've added that capability to Movida's Application Programming Interface (API).

This note describes what has changed in full, and as usual you can contact **support** or your technical account manager for further clarification.

BeBanjo reference(s)

Application	Issue	Title
movida	2518	Provide an API link from Licensor to Titles

Licensor Resource

This change doesn't affect the user interface, but will be useful if you integrate your systems (e.g. a reporting application) with Movida using its API. When you retrieve a **Licensor** using the API you'll notice a new **titles** link:

```
<licensor>
  <id type="integer">1781</id>
  <name>Curzon Home Cinema</name>
  <link rel="self" href="https://movida.bebanjo.net/api/licensors/1781"/>
  <link rel="titles" href="https://movida.bebanjo.net/api/licensors/1781/titles"/>
</licensor>
```

Following that link will retrieve all of the **Titles** for that **Licensor**. Please note that the **titles** resource is paginated and will return 50 results per page like this:

```
<titles type="array">
  <total-entries>479</total-entries>
  <link rel="next" href="https://movida.bebanjo.net/api/licensors/1781/titles?page=2"/>
  <title>
    <id type="integer">251272</id>
    <name>Beware of Mr. Baker</name>
    <title>Beware of Mr. Baker</title>
    <external-id nil="true"/>
    <title-type>feature</title-type>
    <tags></tags>
    <link rel="self" href="https://movida.bebanjo.net/api/titles/251272"/>
    <link rel="schedule" href="https://movida.bebanjo.net/api/titles/251272/schedule"/>
    <link rel="availability_windows" href="https://movida.bebanjo.net/api/titles/251272/availability_windows"/>
    <link rel="title_groups" href="https://movida.bebanjo.net/api/titles/251272/title_groups"/>
    <link rel="licensor" href="https://movida.bebanjo.net/api/licensors/1781"/>
    <link rel="images" href="https://movida.bebanjo.net/api/titles/251272/images"/>
    <link rel="assets" href="https://movida.bebanjo.net/api/titles/251272/assets"/>
    <link rel="metadata" href="https://movida.bebanjo.net/api/titles/251272/metadata"/>
    <link rel="blackouts" href="https://movida.bebanjo.net/api/titles/251272/blackouts"/>
    <link rel="rights" href="https://movida.bebanjo.net/api/titles/251272/rights"/>
    <link rel="trailers" href="https://movida.bebanjo.net/api/titles/251272/trailers"/>
  </title>
  ...
</titles>
```

In this example you can see that there are **479** Titles in total for the Licensor, and a **next** link is provided to retrieve the next 50.
