

Release note

Notifications

Release date: 22 November 2013

Movida can be configured to receive notifications from the platforms it publishes (e.g. XML documents and image files) to; this enables you to have better visibility in the Schedule page of the status of a publication (e.g. to determine whether the platform successfully processed the publication from Movida).

This note describes what has changed in full, and as usual you can contact **support** or your technical account manager for further clarification.

BeBanjo reference(s)

Application	Issue	Title
movida	1360	Handle publication status notifications from the Cardinal platform
movida	1384	Outlets

Notifications in the Schedule page

For platforms with notifications enabled, when a valid Scheduling is published then its subsequent publication status values can be:

- queued > sent > published
- queued > sent > failed

The Metadata Status pop-up in the Schedule page lets you quickly find Schedulings of different statuses: **Has metadata errors** (i.e. "invalid"), **Ready to Publish** (i.e. "valid"), **Publication sent** (i.e. "sent"), **Publication failed** (i.e. "failed"), or **Published** (i.e. "published"). The queued, sent, failed, and published statuses are described below.

1	All statuses	÷
	Has metadata errors	
	Ready to Publish	
	Publication sent	
	Publication failed	
	Published	

Queued: publication of the Scheduling has been requested and is queued waiting to be processed. This status is indicated by the green and white cloud icon in the Schedule page.

Sent: the documents and files for the Scheduling have been successfully delivered to the platform, but a notification from the platform has not been received by Movida. This status is indicated by the green and white cloud icon in the Schedule page like this:

Schedule	for "Notific	cations in N	lovida"			M	lodify		
Showing 1 to 1 of 1 titles			Select: 1 title in this page none			none	FILTER BY

								Show metadata	\$
							_	LICENSON	

Failed: the documents and files for the Scheduling have been successfully delivered to the platform, but a notification from the platform has been received by Movida indicating that these were not processed successfully. This status is indicated by the red cloud/exclamation mark icon in the Schedule page like this:

Schedule for "Notification	s in Movida"		Modify	
Showing 1 to 1 of 1 titles		Select	FILTER BY	
8 DECEMBER, 2013 - 1 Title				TITLE
