

Release note

Deals

Release date: 29 November 2013

As part of the our on-going work to improve and extend the Deals functionality in Movida several incremental changes have been released over the last few weeks. These changes bring the visual appearance of the various Deals pages in line with the Catalog and add several useful new features.

Upcoming enhancements to the Deals functionality in Movida include support for adding attachments to a Deal.

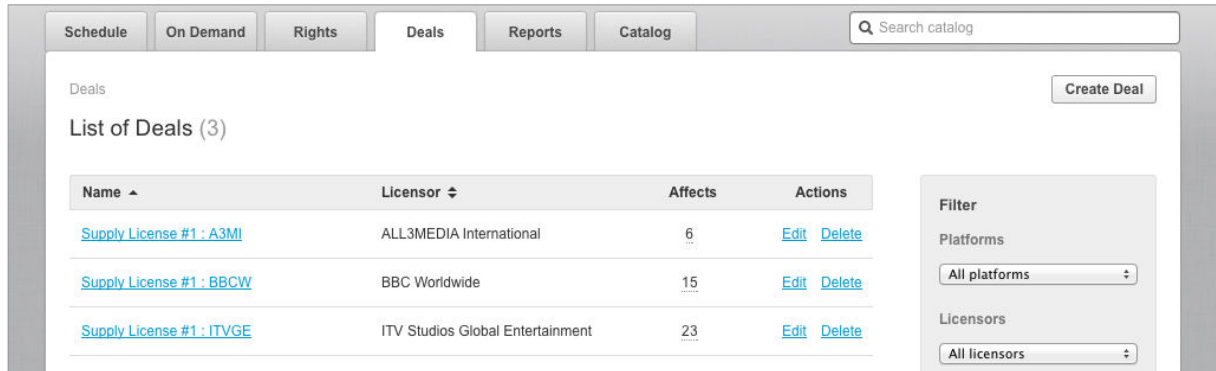

This note describes what has changed in full, and as usual you can contact **support** or your technical account manager for further clarification.

BeBanjo reference(s)

Application	Issue	Title
movida	574	Allow deletion of content deals
movida	1453	Implementation of new deals index page
movida	1454	Implementation of new deal pages
movida	1456	Implement edit deal page
movida	1538	Add Catalog Series and/or Features to deals
movida	1546	Support CatchUp Deals

Deals

When you select the Deals tab in Movida you'll see a list of the Deals currently defined for your Company:

The screenshot shows the 'Deals' tab selected in the top navigation. Below the navigation is a search bar and a 'Create Deal' button. The main content area is titled 'List of Deals (3)' and contains a table with the following data:

Name ▲	Licensor ▼	Affects	Actions
Supply License #1 : A3MI	ALL3MEDIA International	6	Edit Delete
Supply License #1 : BBCW	BBC Worldwide	15	Edit Delete
Supply License #1 : ITVGE	ITV Studios Global Entertainment	23	Edit Delete

On the right side, there is a 'Filter' sidebar with the following options:

- Platforms: All platforms
- Licensors: All licensors

On this page you can sort the list of deals by Name (of the Deal) or Licensor; the single triangle indicates which column is being used for sorting, and the direction of the triangle shows the order (ascending or descending).

From this page you can also create a new Deal (described in the **Creating Deals** release note from 31 July) and filter the list of Deals by different combinations of Platform and Licensor, along with your Company specific requirements (e.g. Business Models, Devices, and Territories etc.).

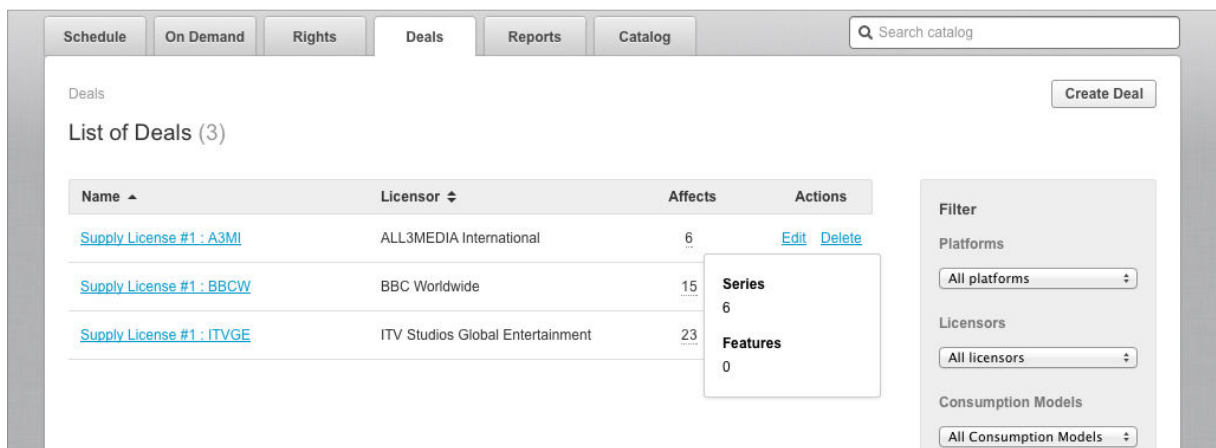

Notice that the page title includes the total number of Deals currently defined; a maximum of thirty Deals are displayed on a page and if there are more than thirty then you'll see additional page numbers and previous/next buttons to navigate the list Deals:

The screenshot shows the pagination controls at the bottom of the page. It includes a 'Prev' button on the left, a series of page numbers (1, 2, 3, 4, 5, 6, 7) in the center, and a 'Next' button on the right.

Use the Edit and Delete links to either edit the parameters of the Deal, or delete it and all of its associated License Windows (a warning is given if you choose this option!).

The number of License Windows for each Deal is shown, and hovering over this number will show you a breakdown by Series and Feature:

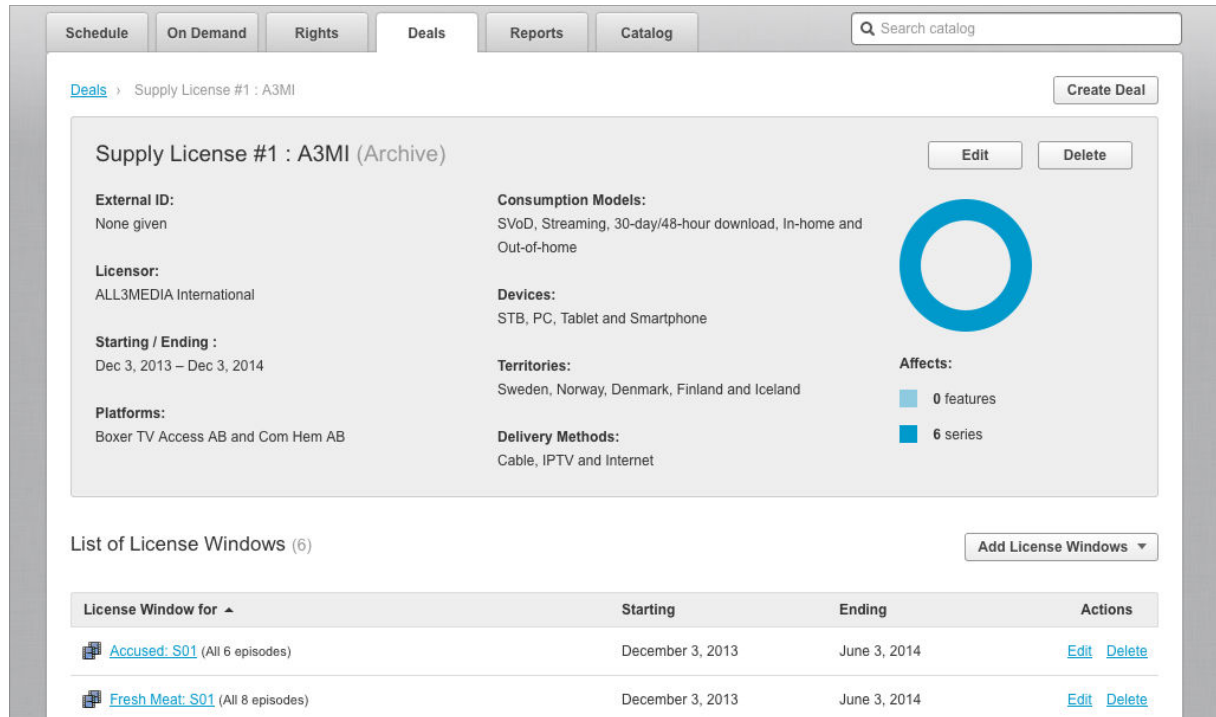

This screenshot is identical to the one above, but with a tooltip displayed over the 'Affects' column for the 'Supply License #1 : BBCW' deal. The tooltip shows the following breakdown:

- Series: 6
- Features: 0

License Windows

From the Deals page you can click the name of a Deal to see its parameters and License Windows:

The screenshot shows a web interface for managing deals. At the top, there are navigation tabs: Schedule, On Demand, Rights, Deals, Reports, and Catalog. A search bar is located on the right. The main content area is titled 'Supply License #1 : A3MI (Archive)' and includes buttons for 'Edit' and 'Delete'. Below the title, there are several sections of parameters:

- External ID:** None given
- Licensor:** ALL3MEDIA International
- Starting / Ending :** Dec 3, 2013 – Dec 3, 2014
- Platforms:** Boxer TV Access AB and Com Hem AB
- Consumption Models:** SVoD, Streaming, 30-day/48-hour download, In-home and Out-of-home
- Devices:** STB, PC, Tablet and Smartphone
- Territories:** Sweden, Norway, Denmark, Finland and Iceland
- Delivery Methods:** Cable, IPTV and Internet

To the right of these parameters is a donut chart labeled 'Affects:' showing '0 features' (light blue) and '6 series' (dark blue). Below this is a 'List of License Windows (6)' section with an 'Add License Windows' button. The list is a table with columns for 'License Window for', 'Starting', 'Ending', and 'Actions'.

License Window for	Starting	Ending	Actions
 Accused: S01 (All 6 episodes)	December 3, 2013	June 3, 2014	Edit Delete
 Fresh Meat: S01 (All 8 episodes)	December 3, 2013	June 3, 2014	Edit Delete

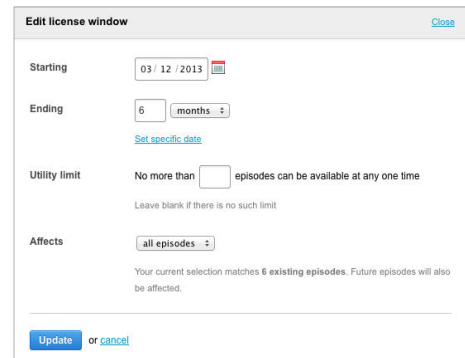

The top section of this page clearly shows the type of Deal (Archive in this example) and the parameters for the Deal, along with a visual indication of the distribution of Series and Features affected by the Deal.

From this page you can also create a new Deal (described in the **Creating Deals** release note from 31 July) and either edit the parameters of the Deal, or delete it and all of its associated License Windows (a warning is given if you choose this option!).

The list of License Windows defined by the Deal is shown and can be sorted by Series and Feature name, start date, or end date; the single triangle indicates which column is being used for sorting, the direction of the triangle shows the order (ascending or descending).

Notice that the total number of License Windows currently defined is displayed; a maximum of thirty License Windows are displayed on a page and if there are more than thirty then you'll see additional page numbers and previous/next buttons to navigate the list of License Windows.

Use the Edit and Delete links to either edit the License Window, or delete it (a warning is given if you choose this option!).

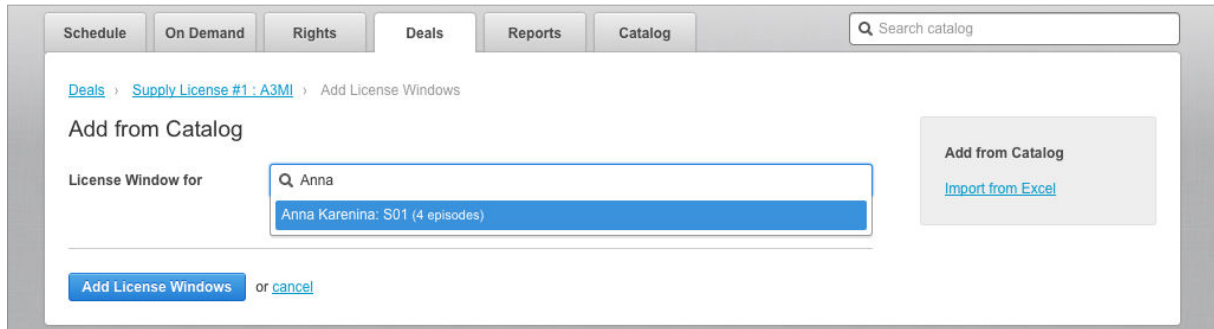

The 'Edit license window' dialog box contains the following fields and options:

- Starting:** 03 / 12 / 2013
- Ending:** 6 months
- Utility limit:** No more than episodes can be available at any one time. Leave blank if there is no such limit.
- Affects:** all episodes

At the bottom, there is an 'Update or cancel' button.

When editing the License Window for a Series you can also choose which Episodes are affected (i.e. all Episodes, all Episodes except specific ones, or only specific Episodes) and define the Utility Limit (to determine how many Episodes can be available at any one time).

When adding License Windows to the Deal you can choose to either import an Excel document, or select Series and Features directly from the Catalog:

This feature works in the same way as adding Titles to a Title Group (Collection) and can be a great timesaver over importing an Excel document. Remember that you can also edit the License Window at this point, just click the **Edit** link next to the License Window before you click the **Add License Windows** button.

License Window start and end dates

When you add License Windows for a Series or Feature to a Deal, by either adding from the Catalog or importing from an Excel document, you can choose to define the start and end date of the License Window. If you don't do this then the start and end dates of the License Window are *inherited* from the start and end date of the Deal itself.

If the start or end dates of the Deal are changed then any License Windows that are *inherited* from the Deal will also be changed, but any License Windows that have been explicitly defined will **not** be updated.

Catch-Up Deals

To-date, Deals only applied to Archive content in the Catalog but now you can create Deals for your Catch-Up content. We think this will save you valuable time because you no longer have to apply Rights to each Series you select for Catch-Up.

If the Catch-Up module is enabled for your Company in Movida then you will see a **Type** option in the Create Deal page where you define whether the Deal is for Archive or Catch-up content; the Archive options are the same as those described above. If you choose a Type of Catch-up then the Create Deal page contains these additional options:

The screenshot shows the 'Create Deal' form for Catch-Up content. It includes the following fields:

- Type:** A dropdown menu set to 'Catch-Up'.
- Starting:** A text input field, a 'minutes' dropdown, and a 'before TX starts' dropdown. Below this is a link: [Set specific date](#).
- Transmission:** A '1st TX' dropdown, an 'in' label, and an 'any channel' dropdown.
- Ending:** A text input field, a 'minutes' dropdown, an 'after' label, and an 'its start date' dropdown. Below this is a link: [Set specific date](#).

When you have added one or more Series to a Catch-Up Deal you can edit their License Windows and customise their parameters.

The screenshot shows the 'Edit license window' dialog box. It includes the following fields and options:

- Starting:** A text input field with '1', a 'hours' dropdown, and an 'after TX ends' dropdown. Below this is a link: [Set specific date](#).
- Transmission:** A '1st TX' dropdown, an 'in' label, and an 'any channel' dropdown.
- Ending:** A text input field with '7', a 'days' dropdown, an 'after' label, and an 'its start date' dropdown. Below this is a link: [Set specific date](#).
- Utility limit:** A label 'No more than' followed by a text input field and the text 'episodes can be available at any one time'. Below this is the text 'Leave blank if there is no such limit'.
- Affects:** A dropdown menu set to 'all episodes'.
- Below the 'Affects' dropdown is the text: 'Your current selection matches 53 existing episodes. Future episodes will also be affected.'
- At the bottom are 'Update' and 'cancel' buttons.
