

Release note

Title Groups should be Collections

Release date: 21 March 2014

What are Title Groups? Are they Collections or Series? Or both? It's these sort of existential question we try to answer for you at BeBanjo when we make incremental changes...

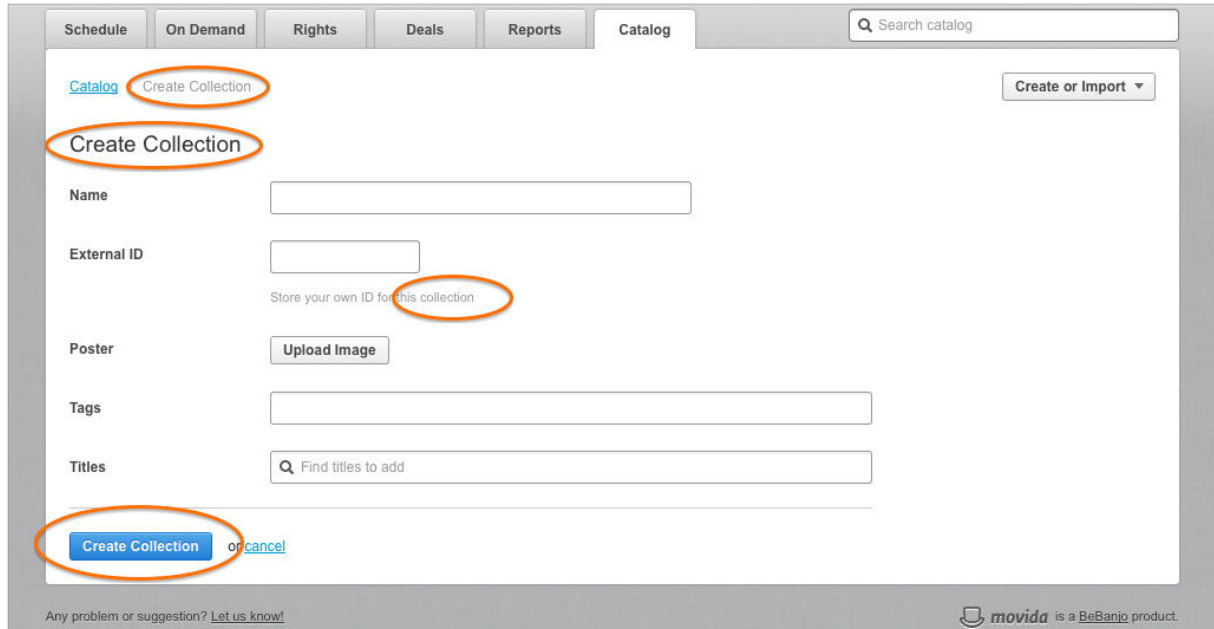

This note describes what has changed in full, and as usual you can contact [support](#) or your technical account manager for further clarification.

BeBanjo reference(s)

Application	Issue	Title
movida	1960	Title Groups should be Collections

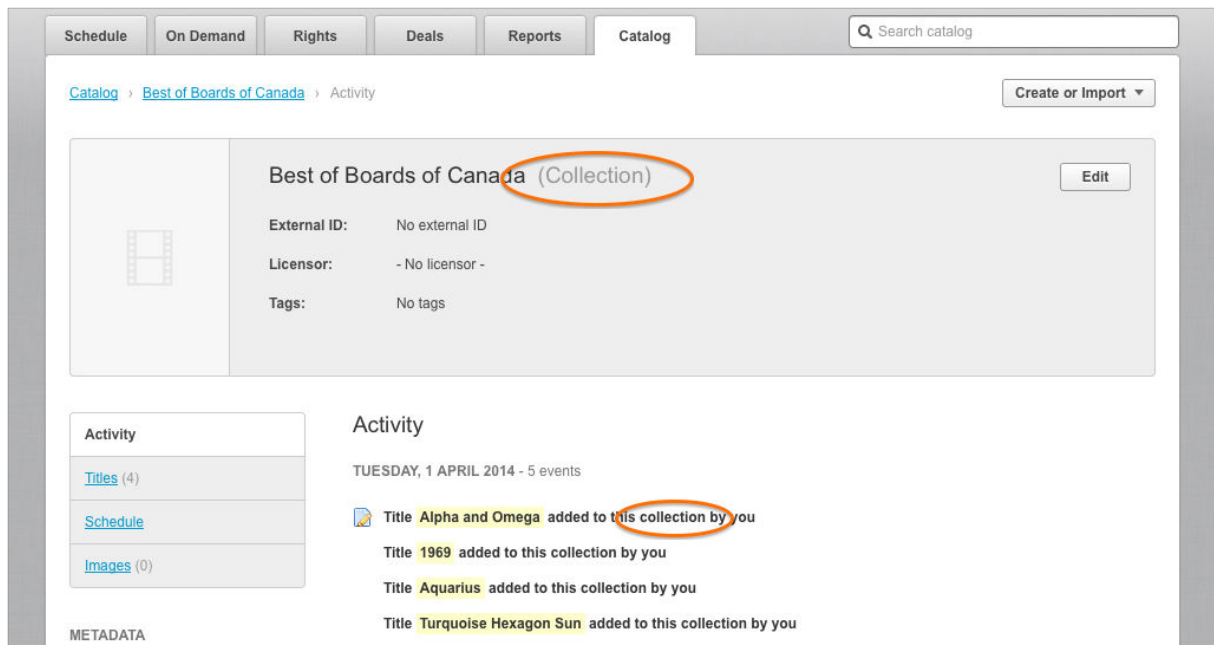

To remove a little angst from your life we're **finally** consistent in how we name things in Movida. So, now a Collection is always a Collection and a Series is always a Series. Sweet. For those robots out there, don't worry! The **API** still knows all about Title Groups and you don't have to work any differently. Time for an oil change! Two examples of the changes in Movida are shown below.

Create Collection

The screenshot shows the 'Create Collection' form in the Movida interface. The form is located under the 'Catalog' tab. It includes a search bar for titles and a 'Create or Import' dropdown menu. The form fields are: Name, External ID, Poster (with an 'Upload Image' button), Tags, and Titles. A search bar for titles is also present. The 'Create Collection' button and the 'Create or Import' dropdown are highlighted with orange circles. The 'External ID' field has a note: 'Store your own ID for this collection'.

Collection

The screenshot shows the 'Collection' page in the Movida interface. The page is located under the 'Catalog' tab. It shows the details for a collection named 'Best of Boards of Canada'. The collection name is circled in orange. The page also displays an activity log for the collection, showing titles added to it. The activity log is titled 'Activity' and shows 'TUESDAY, 1 APRIL 2014 - 5 events'. The activity log entries are: 'Title Alpha and Omega added to this collection by you', 'Title 1969 added to this collection by you', 'Title Aquarius added to this collection by you', and 'Title Turquoise Hexagon Sun added to this collection by you'. The 'this collection' text in the first entry is circled in orange.

Even the URL in the location bar of your web browser gets into the act, for example: <https://movida.bebanjo.net/collections/28337>.
