

Release note

Series and Episode improvements

Release date: 1 April 2014

We've improved the Series and Episodes functionality in Movidia to make it even easier for you to create and edit a Series and its Episodes.

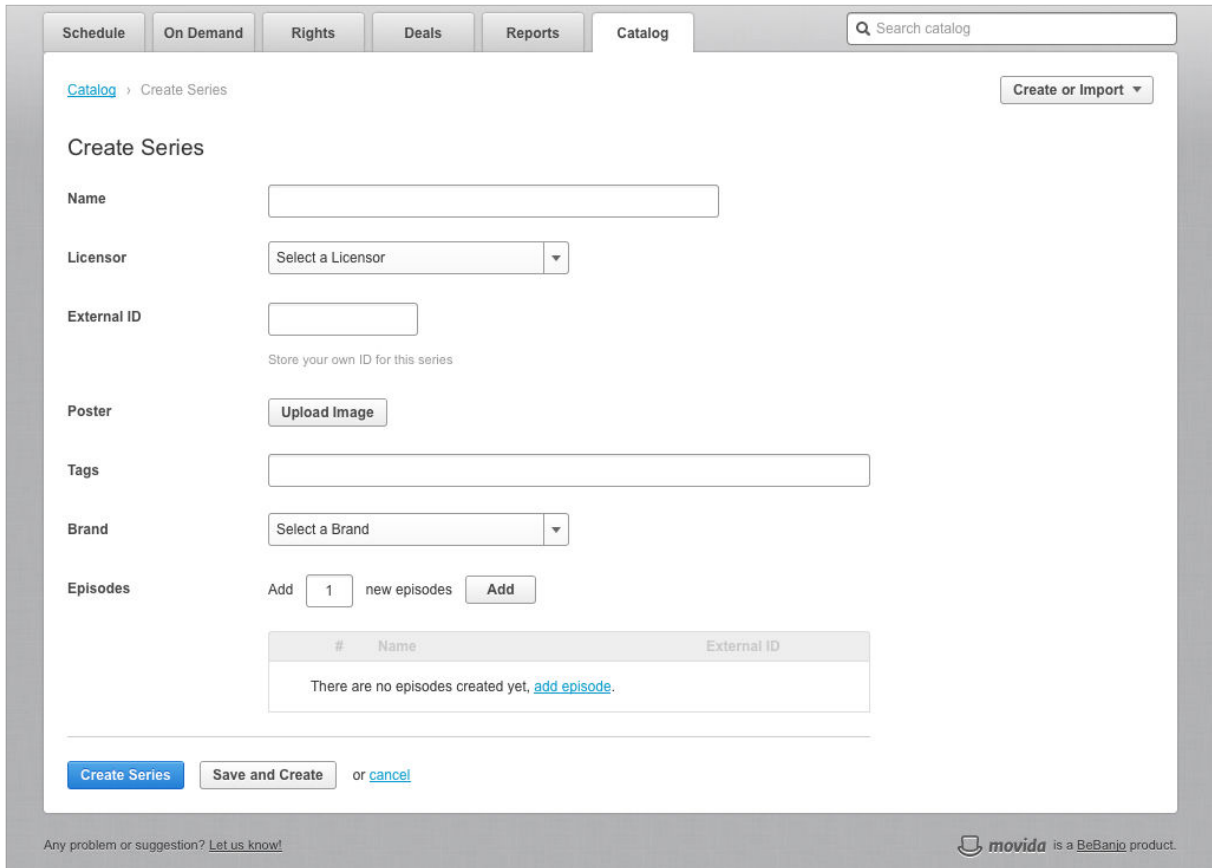

This note describes what has changed in full, and as usual you can contact [support](#) or your technical account manager for further clarification.

BeBanjo reference(s)

Application	Issue	Title
movidia	2084	Series and Episodes revamp.

Create Series

The Create Series page has been improved and it's now easier to add, remove, and reorder Episodes when creating a Series. Here's the new Create Series page:

The screenshot shows the 'Create Series' page with the following elements:

- Navigation tabs: Schedule, On Demand, Rights, Deals, Reports, Catalog.
- Search bar: Search catalog.
- Breadcrumb: Catalog > Create Series.
- Buttons: Create or Import (dropdown).
- Form fields:
 - Name: Text input.
 - Licensor: Select a Licensor (dropdown).
 - External ID: Text input with a note: "Store your own ID for this series".
 - Poster: Upload Image button.
 - Tags: Text input.
 - Brand: Select a Brand (dropdown).
 - Episodes: Add [1] new episodes [Add] button.
- Table:

#	Name	External ID
There are no episodes created yet, add episode .		
- Bottom buttons: Create Series, Save and Create, or [cancel](#).
- Footer: Any problem or suggestion? [Let us know!](#) |  is a BeBanjo product.

Notice that there's a new table in the Episodes section and the "I also want to create" checkbox has been removed; here's how that section used to look like:

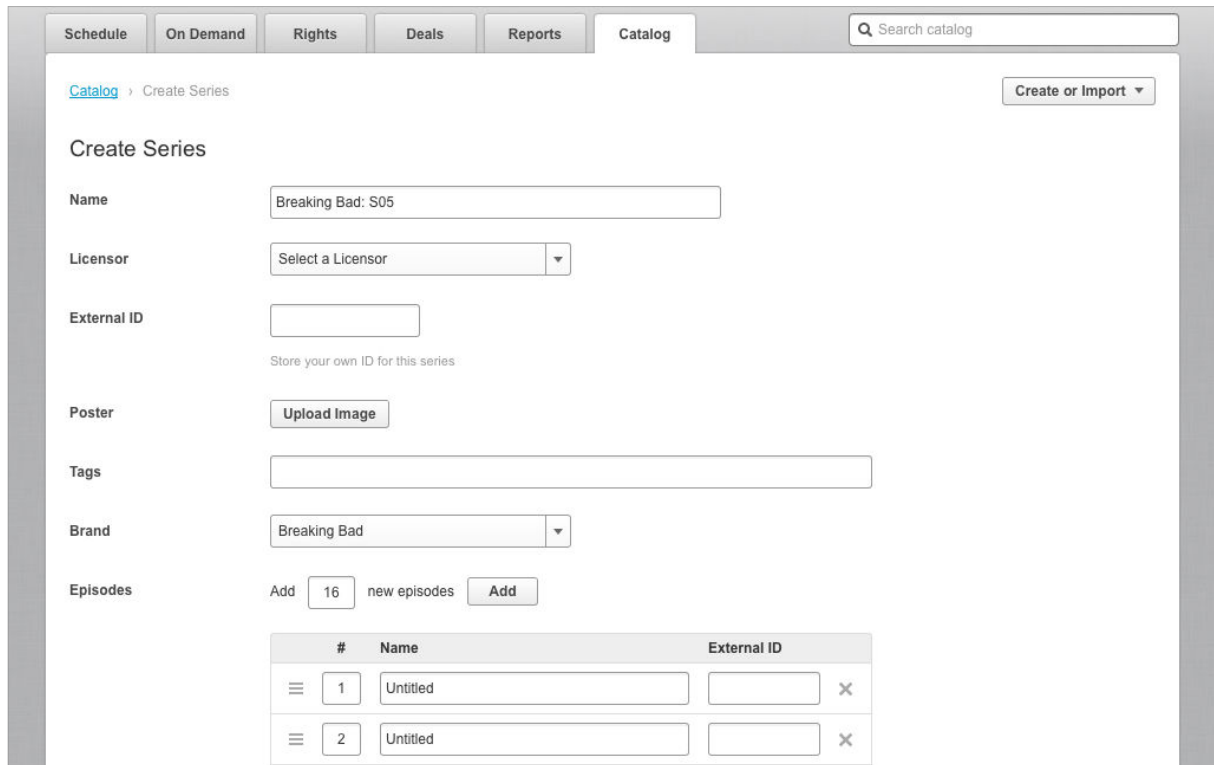

The screenshot shows the 'Episodes' section of the old interface:

- Episodes: I also want to create [1]
- Table:

No.	Name
1	Untitled
- Link: [Add more episodes](#)
- Bottom buttons: Create Series, Save and Create Another, or [cancel](#).

If you choose to add Episodes when creating the Series you'll see this page:

Create Series

Name: Breaking Bad: S05

Licensor: Select a Licensor

External ID:

Poster: Upload Image

Tags:

Brand: Breaking Bad

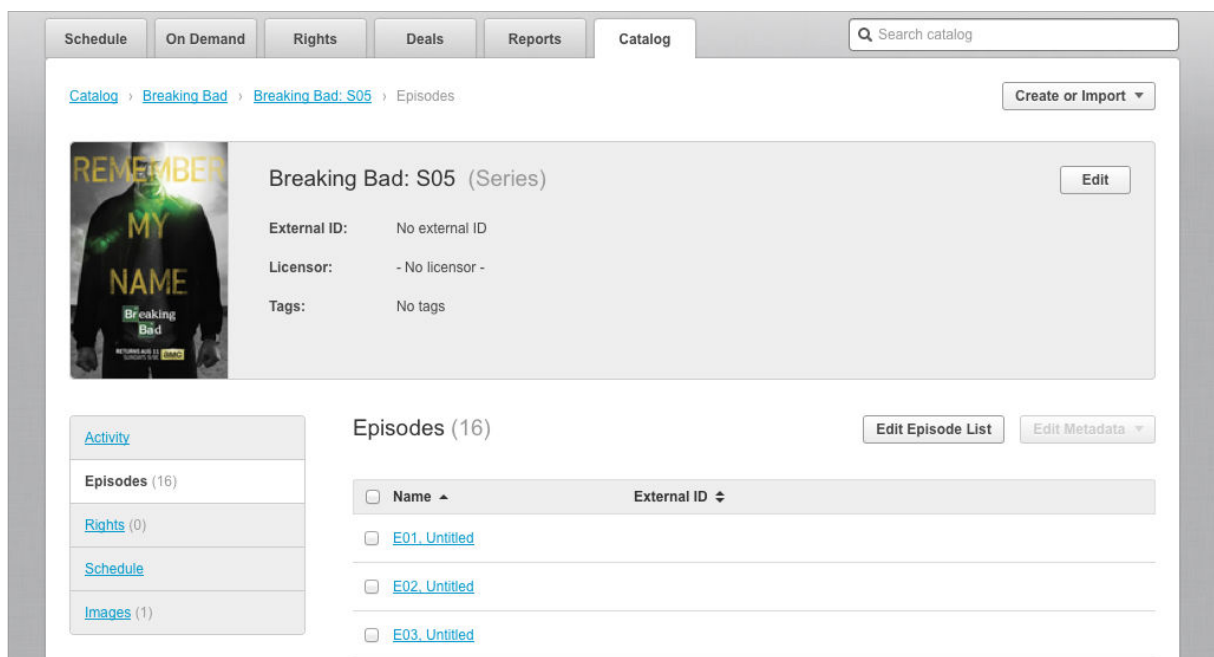

Episodes: Add 16 new episodes

#	Name	External ID
1	Untitled	<input type="text"/>
2	Untitled	<input type="text"/>

Notice that the table of Episodes lets you specify the External ID for each Episode, and there's a "handle" against each Episode that lets you re-order the Episodes before you create the Series; you can also easily remove an Episode by clicking its cross icon.

Episodes

The Episodes page has been improved so that you can sort the table of Episodes (e.g. by Name or External ID), and the **Edit Metadata** button is disabled unless you've selected an Episode. Here's the new Episodes page:

Breaking Bad: S05 (Series)

External ID: No external ID

Licensor: - No licensor -

Tags: No tags

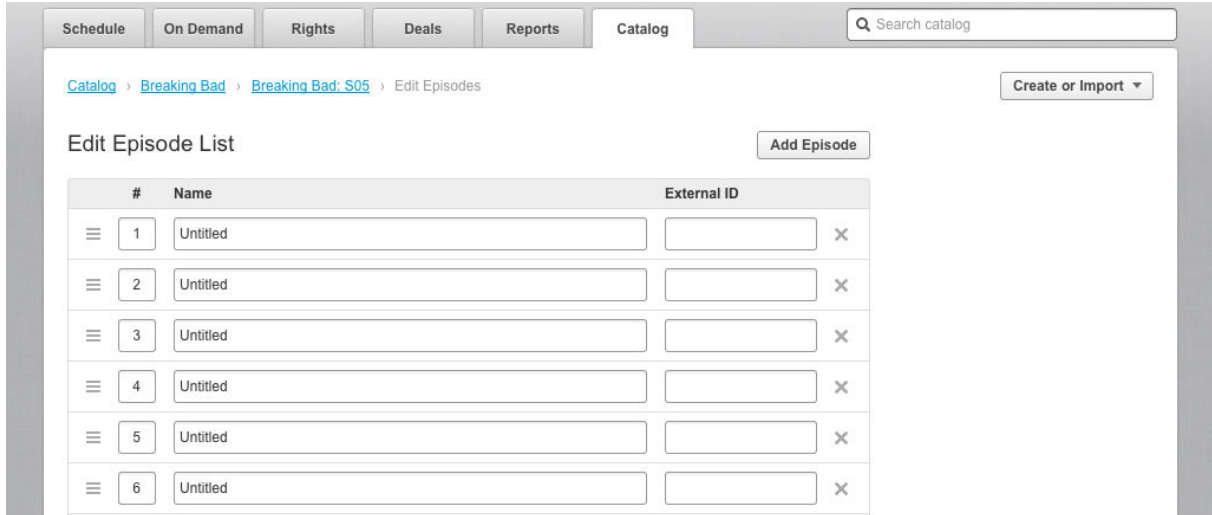

Episodes (16)

Name	External ID
E01. Untitled	
E02. Untitled	
E03. Untitled	

Please note that if a Series contains more than 40 Episodes then the list is paginated.

Edit Episode List

Clicking the **Edit Episode List** button in the Episodes section for a Series will show the new Edit Episode List page:

#	Name	External ID
1	Untitled	
2	Untitled	
3	Untitled	
4	Untitled	
5	Untitled	
6	Untitled	

Notice that there's a "handle" against each Episode that lets you re-order the Episodes; you can also easily remove an Episode by clicking its cross icon. New Episodes can be added to the Series by using the **Add Episode** button.

The table of Episodes also lets you specify the External ID for each Episode, and if you choose an External ID that has already been used then an error message is displayed.

If you remove Episodes and click the Update Episodes button then a warning is displayed to let you know that you're about to delete Episodes from the Catalog (along with any Schedulings etc.).
