

Release note

User management with BeBanjo ID

Release date: 17 November 2014

The more the merrier! We are introducing a new way to manage your Company in Movida and we are calling it BeBanjo ID: one passport to the whole suite of BeBanjo applications. You can invite people, track user access, have better profiles, heck, we even added avatars! One of our biggest releases to date, read on...

This note describes what has changed in full, and as usual you can contact [support](#) or your technical account manager for further clarification.

BeBanjo ID

BeBanjo ID is our new authentication and authorisation system, built to manage access to all BeBanjo applications. We've added commonly requested features that allow you to manage user accounts, giving you the freedom to manage your own teams in our applications.

BeBanjo ID works in a similar way to its predecessor (Sheriff), and when trying to access Movidia or Sequence without being authorised you will be prompted to enter your username and password. If your credentials are valid you will be redirected to the requested application (e.g. Movidia or Sequence).

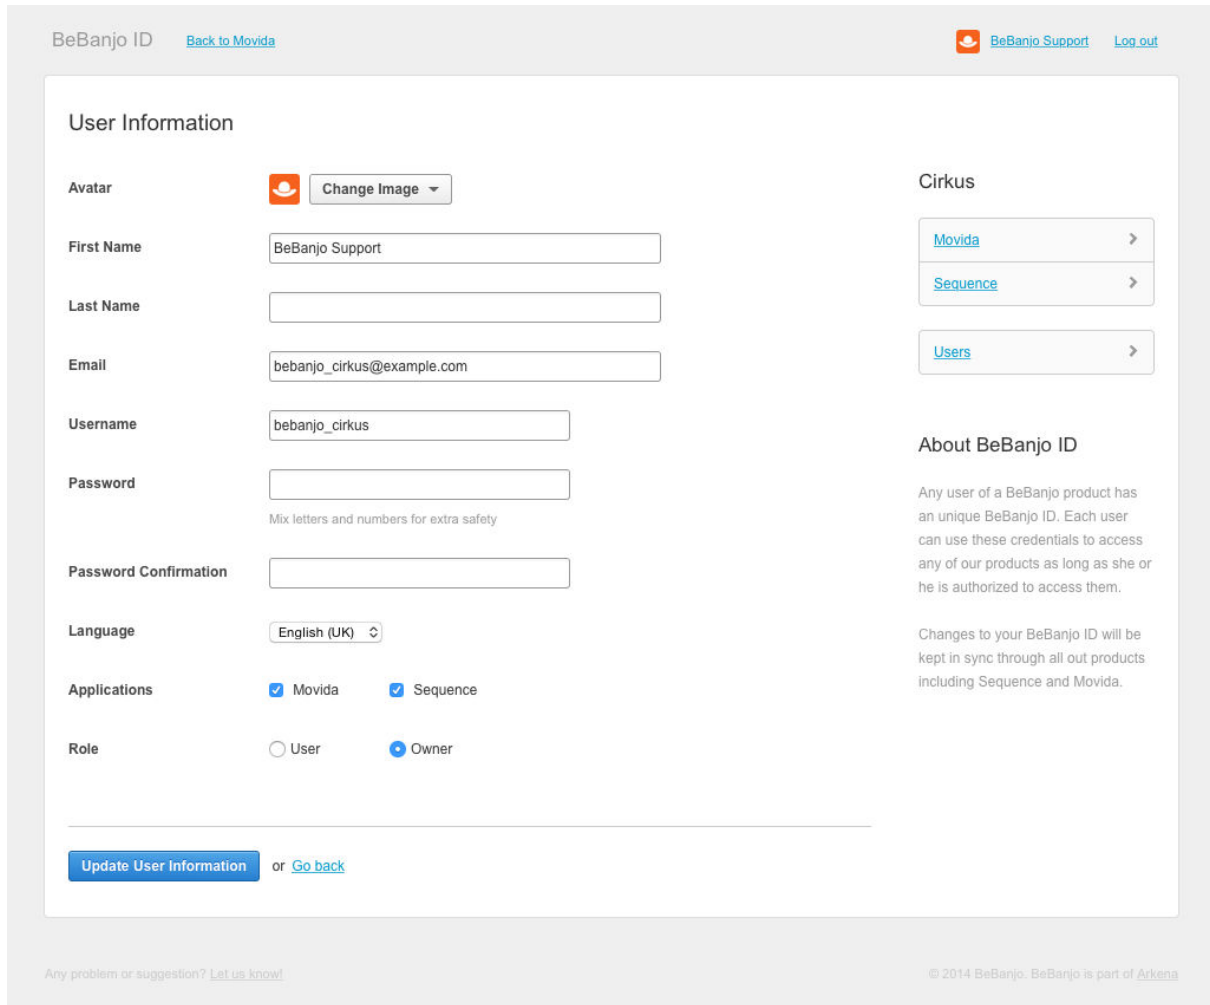

The first thing that you'll notice with the release of BeBanjo ID is that we've changed the headers in Movidia and Sequence, they both work in a similar way. Clicking on your user name or avatar provides access to your **User Information** page. If your role is defined as an **Owner** there is also a **Users** option in the new **Settings** menu where you can see all users in your Company and invite new ones.

Previous sections like Platforms and Activity are also under the Settings menu now and work just like before.

The **User Information** page displays relevant information for you or another user: First Name, Last Name, Email, Username, Language, Applications, and Role.

The screenshot shows the 'User Information' page in the BeBanjo ID interface. At the top left, it says 'BeBanjo ID' with a 'Back to Movida' link. At the top right, there are links for 'BeBanjo Support' and 'Log out'. The main content area is titled 'User Information' and contains several sections:

- Avatar:** A BeBanjo logo icon and a 'Change Image' button.
- First Name:** A text input field containing 'BeBanjo Support'.
- Last Name:** An empty text input field.
- Email:** A text input field containing 'bebanjo_cirkus@example.com'.
- Username:** A text input field containing 'bebanjo_cirkus'.
- Password:** An empty text input field with a note below it: 'Mix letters and numbers for extra safety'.
- Password Confirmation:** An empty text input field.
- Language:** A dropdown menu set to 'English (UK)'.
- Applications:** Two checked checkboxes: 'Movida' and 'Sequence'.
- Role:** Two radio buttons: 'User' (unchecked) and 'Owner' (checked).

On the right side of the page, there is a 'Cirkus' section with three dropdown menus: 'Movida', 'Sequence', and 'Users', each with a right-pointing arrow. Below this is an 'About BeBanjo ID' section with two paragraphs of text explaining the unique BeBanjo ID and how changes are synced across products.

At the bottom of the form area, there is a blue 'Update User Information' button followed by 'or [Go back](#)'.

At the very bottom of the page, there is a footer with the text: 'Any problem or suggestion? [Let us know!](#)' on the left and '© 2014 BeBanjo. BeBanjo is part of [Arkens](#)' on the right.

You can change your own Email, Username, or Password but not for other users. This page also lets you assign an avatar, choose something nice to identify you across all applications!

The **Users** page is where *Owners* can manage their team: invite new users, remove users, choose whether to give users access to both Movidia and Sequence or only one application. Be careful when inviting new users, with great power comes great responsibility!

As well as being able to invite and remove users, an *Owner* can also amend some details of other users: First Name, Last Name, Language, Applications, and Role.

Inviting a new user to your Company is really simple. Just go to the **Users** page and click **Invite Users**. Enter the email address of every person that you want to invite, choose what applications they will have access to and whether their role is a *User* or *Owner*. Click **Send Invitations** and they will receive an email invitation in their inbox.

The screenshot shows the 'Invite Users' form in the Cirkus interface. At the top left, the word 'Cirkus' is displayed. At the top right, there are links for 'BeBanjo Support' and 'Log out'. The form itself is titled 'Invite Users' and contains the following fields and options:

- Emails:** A text input field containing the email addresses 'tim@apple.com, bill@microsoft.com, sergey@google.com'. Below the field, a note states: 'You can invite several people separating emails using commas'.
- Applications:** Two checkboxes are present: 'Movida' (checked) and 'Sequence' (checked).
- Role:** Two radio buttons are present: 'User' (selected) and 'Owner' (unselected).

At the bottom of the form, there is a blue button labeled 'Send Invitations' followed by the text 'or [Go back](#)'. At the very bottom of the page, there is a footer with the text 'Any problem or suggestion? [Let us know!](#)' on the left and '© 2014 BeBanjo. BeBanjo is part of [Arkana](#)' on the right.

Going back to the **Users** page you can see whether a user has completed their profile and whether they have logged in. If for some reason you want to revoke the invitation, then click the delete icon in the same row.

For more information on how to use BeBanjo ID check the **BeBanjo ID Preview** document or contact your technical account manager.
