

Release note

New selector for Platforms

Release date: 15 December 2014

So, not only do some of you have many users you also have plenty of Platforms for them to manage! To make it easier to work with many Platforms in Movida we've redesigned the *selector* you use to pick and choose Platforms.

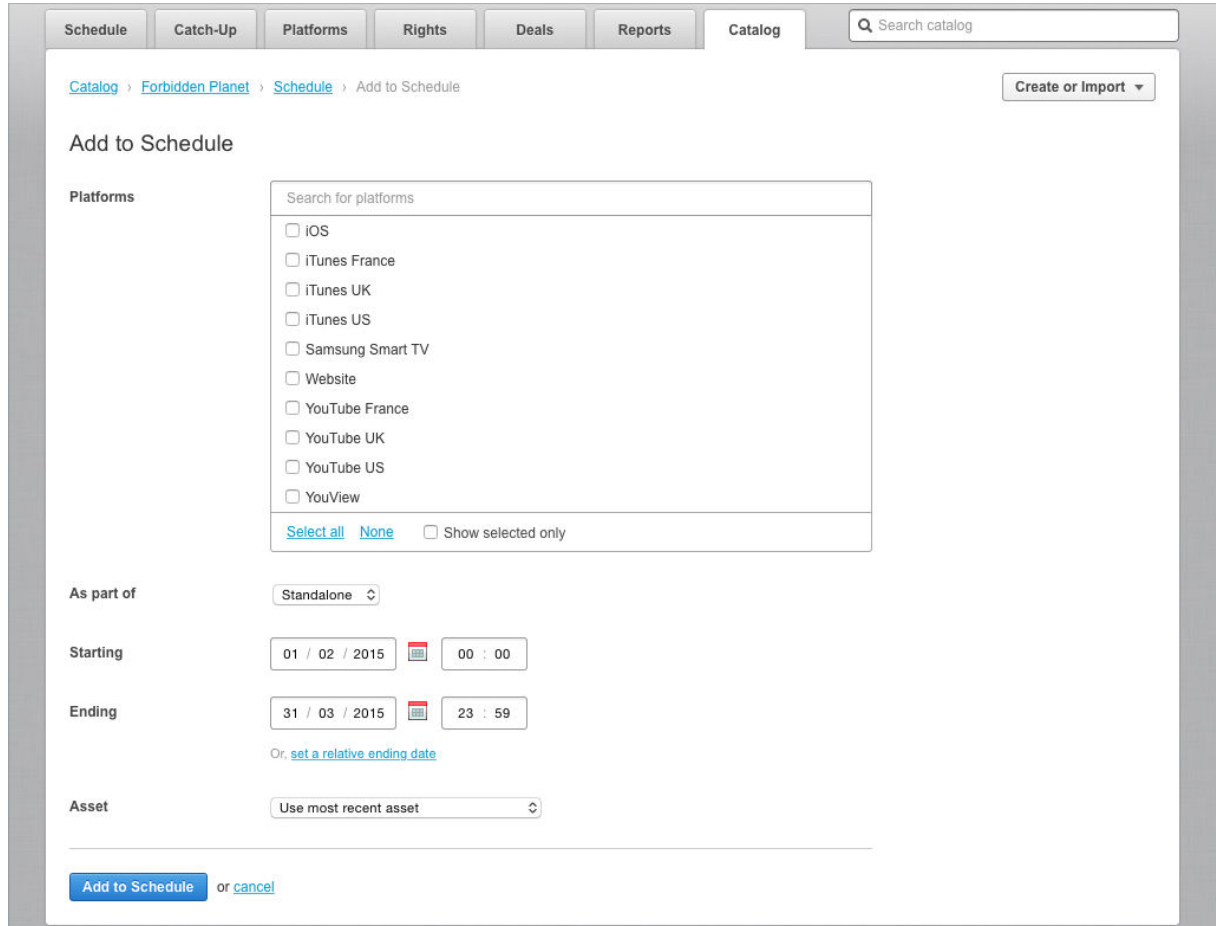

This note describes what has changed in full, and as usual you can contact **support** or your technical account manager for further clarification.

The Selector

The Platforms selector is used in several places, for example **Add to Schedule**, **Edit Image**, **Edit Deal** etc., and its appearance and functionality has been much improved. Here's how it looks now, using Add to Schedule as an example:

The screenshot shows the 'Add to Schedule' interface. At the top, there are navigation tabs: Schedule, Catch-Up, Platforms, Rights, Deals, Reports, and Catalog. A search bar labeled 'Search catalog' is on the right. Below the tabs, the breadcrumb path is 'Catalog > Forbidden Planet > Schedule > Add to Schedule'. A 'Create or Import' button is in the top right. The main heading is 'Add to Schedule'. Under 'Platforms', there is a search box 'Search for platforms' containing a list of platforms with checkboxes: iOS, iTunes France, iTunes UK, iTunes US, Samsung Smart TV, Website, YouTube France, YouTube UK, YouTube US, and YouView. Below the list are links 'Select all' and 'None', and a checkbox 'Show selected only'. Below the Platforms section, there are fields for 'As part of' (Standalone), 'Starting' (01 / 02 / 2015, 00 : 00), 'Ending' (31 / 03 / 2015, 23 : 59), and 'Asset' (Use most recent asset). At the bottom, there are buttons 'Add to Schedule' and 'cancel'.

You can: search for Platforms, quickly select all or no Platforms, and show which Platforms you've chosen. In the example above, searching for **itu** will show this:

This close-up shows the Platforms selector with the search term 'itu' entered in the search box. The search results list three platforms: iTunes France, iTunes UK, and iTunes US, each with an unchecked checkbox. At the bottom of the list, there are links 'Select all' and 'None', and a checkbox 'Show selected only'.

To clear your search just click the cross in the **Search for platforms** field, or press the escape key.

If you want to select all of the Platforms in your search results you simply click **Select all**:

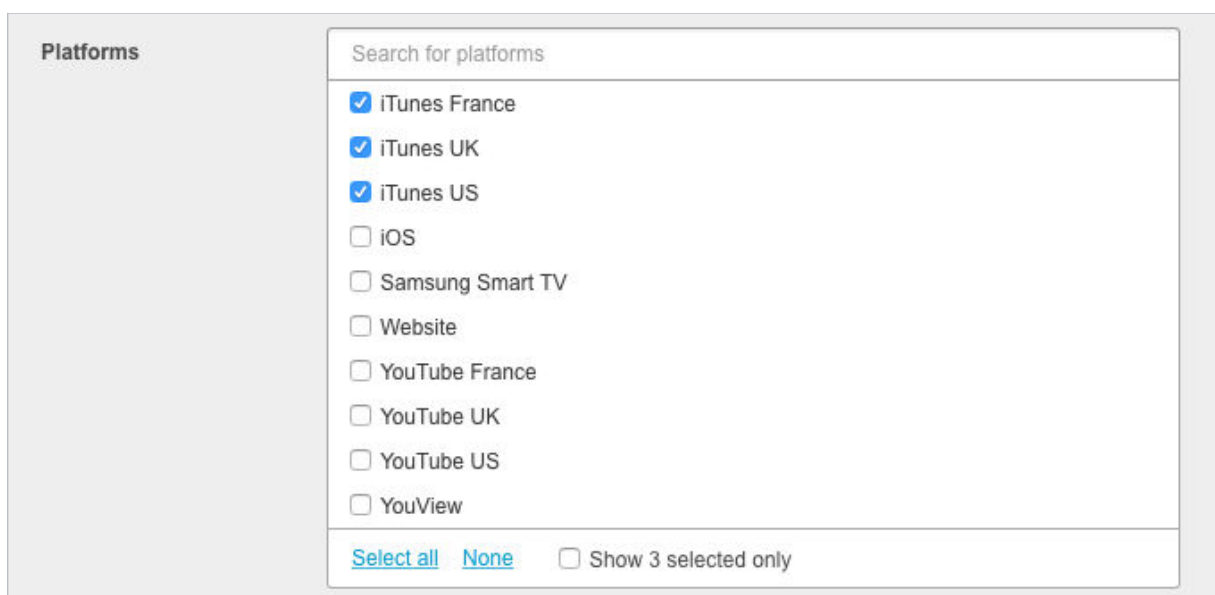

You can also press **control-A** to toggle between **Select all** or **None**, and if you press the shift key as you click a Platform name you can select a *range* of values.

If all of your Platforms cannot be shown at the same time in the selector, how do you quickly check your selections? Easy! Just click **Show selected only**:

When you're editing something where Platforms have previously been selected, e.g an Image, then Movidia will show those at the top of the list:

Nifty!
