

# Release note

## Catalog and Search Result Pages

### Release date: 22 April 2015

Our crack team of designers, front-end developers, and back-end developers never rest in their quest to ensure that Movida is the best choice for managing video-on-demand services! Hot on the heels of the recent technical metadata management features we've implemented a new look and feel for the Catalog page, along with a lot of behind the scenes changes that will help us add new features...

This note describes what has changed in full, and as usual you can contact **support** or your technical account manager for further clarification.

### BeBanjo reference(s)

Application	Issue	Title
movida	3125	Complete the 1.5 design of Catalog and Search results pages

## Catalog

When you open the new Catalog page you'll see that it has been simplified:

The screenshot shows the Movidia Catalog interface. At the top, there is a navigation bar with tabs for Schedule, Catch-Up, Rights, Deals, Reports, and Catalog. A search bar is located to the right of the Catalog tab. Below the navigation bar, the main content area is titled 'Catalog' and features a row of eight movie posters: Gravity, Kick-Ass 2, The Hobbit, The Great Gatsby, Blue is the Warmest Colour, Forbidden Planet, Drive, and Spring Breakers. Below the posters, there is a section titled 'What's new' with an 'Export' button and a 'Create or Import' dropdown. The main content is a table with columns for Name, Type, and Licensor. The table lists several items, each with a checkbox, a link to the item name, a small icon, the type (e.g., Feature), and the licensor (e.g., Millennium Entertainment). To the right of the table is a sidebar filter with sections for Filter (text input), Licensor (dropdown), Tags (dropdown), and Metadata (dropdown and text input).

<input type="checkbox"/>	Name	Type	Licensor
<input type="checkbox"/>	<a href="#">What Maisie Knew</a> F0020 Film, Drama	Feature	Millennium Entertainment
<input type="checkbox"/>	<a href="#">The Bling Ring</a> F0014 Film, Drama	Feature	A24
<input type="checkbox"/>	<a href="#">Spring Breakers</a> F0013 Film, Drama	Feature	A24
<input type="checkbox"/>	<a href="#">The Girl with the Dragon Tattoo</a> F0015 Film, Thriller	Feature	Metro-Goldwyn-Mayer
<input type="checkbox"/>	<a href="#">Skyfall</a> F0012 Film, Thriller	Feature	Metro-Goldwyn-Mayer

The poster images at the top of the page depict the Features, Episodes, Series, or Collections that you've recently accessed. Initially, Movidia will list the 25 most recently added Features, Series, or Collections. At this point only the first **10** are shown, but when you *filter* the Catalog then Movidia will show **30** items per page.

Notice that it's easier to identify the type (e.g. Feature) of an item and its Licensor; the External Identifier and Tags are shown under the item name. If you click the icon next to the item name then the Schedule page will be opened, filtered for the item you selected. *Nifty!*

The new sidebar lets you easily filter the Catalog so you can quickly find what you're looking for (don't tell **Bono!**).

The **Licensor** and **Tags** selectors are *searchable* which make it easier to find the Licensor or Tag you want to use, and the Metadata filter lets you search for values in all of the metadata attributes defined for you company. You can combine all of the options in the sidebar to perform complex searches; to **reset** your filter simply click the Catalog tab at the top of the page.

This image shows a close-up of the sidebar filter controls. It includes a 'Filter' section with a text input field for 'Title, external ID or asset'. Below that is a 'Licensor' section with a dropdown menu currently set to 'Buena Vista'. The 'Tags' section has a dropdown menu set to 'Family'. The 'Metadata' section has two dropdown menus: 'Title' and 'Show Type', and a text input field for 'Movie'.
